

YouTube AS3 Wrapper

Hvordan laster man inn flere av YouTube's
AS2 Chromeless player via LocalConnection
inn i én og samme AS3 kontekst?

Hva finnes allerede?

Problemstilling:

Vi har endel YouTube AS3 Wrapper'e, men men ikke noen som kan ha flere instanser av spilleren lastet inn i samme SWF.

Utfordringene:

- Unik LocalConnection ID
- Kommunikasjon mellom AS2 -AS3

Verktøy:

- Grant Skinner's SWFBridge klasser
- YouTube API
